

T-type 3 Way Manifold

Specifications:

Max.Working Pressure	6000PSI/400Bar
Max.Working Temperature	200° C
Material of Constructions	SS/CS
Process Connections	½ " NPT (F)
Instrument Connections	Flanged
Drain	¼ " NPT (F)
Gland Packing	PTFE

Applications:

This type of manifold is used for Differential pressure application. The fanged valve outlet is bolted directly to the pressure transmitter body. It has two isolation valves, one equalizer with drain. Mainly used for D.P transmitters.
